

CoRIS Place Keyword Thesaurus by Ocean - 3/2/2016
Pacific Ocean (*without the Great Barrier Reef*)

This keyword list contains Pacific Ocean (excluding Great Barrier Reef) place names of coral reefs, islands, bays and other geographic features in a hierarchical structure. The same names are available from “Place Keywords by Country/Territory - Pacific Ocean (without Great Barrier Reef)” but sorted by country and territory name. Each place name is followed by a unique identifier enclosed in parentheses. The identifier is made up of the latitude and longitude in whole degrees of the place location, followed by a four digit number. The number is used to uniquely identify multiple places that are located at the same latitude and longitude. This is a reformatted version of a list that was obtained from ReefBase.
